SUMMARY

Full-stack software engineer with experience building scalable MERN and Spring Boot applications. Skilled in RESTful API design, cloud deployment, and delivering production-ready features. Actively sharpening system design and algorithms skills for top-tier engineering roles.

EDUCATION

B.E. in Computer Engineering — SNJB's K.B. Jain College of Engineering, Chandwad *Expected May 2026*
HSC (12th) — Jahind Junior College, Dhule *2022 — 71.67%*
SSC (10th) — Ekveera Vidyalaya, Dhule *2020 — 76%*

TECHNICAL SKILLS

Languages: C, C++, Core Java, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Spring Boot, Hibernate
Databases: MongoDB, MySQL, Relational Schema Design
Tools & Platforms: Git, GitHub, Postman, VS Code, Chrome DevTools, Netlify, Railway
Concepts: REST API Design, JWT Auth, System Design, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE **Web Developer Intern** *Jan 2024*

Softcrowd Technologies, Nashik, Maharashtra • Built and optimized responsive UIs using HTML5, CSS3, and JavaScript, improving cross-browser compatibility and mobile responsiveness for client-facing applications.

- Identified and resolved **10+ frontend bugs** in collaboration with cross-functional teams, reducing the UI defect backlog by a significant margin.
- Gained hands-on experience with agile development workflows, sprint cycles, and consistent on-time client project delivery.
- Earned **Certification: Web Development Internship** from Softcrowd Technologies upon successful completion.

PROJECTS **NovaHire — Full-Stack Recruitment Management System** *Live:hire-nova.netlify.app*

React.js, Spring Boot, MySQL, JWT, BCrypt, Netlify, Railway

- Developed a production-grade recruitment platform connecting **recruiters and job seekers** with role-based access control.
- Implemented secure authentication using **JWT** and password hashing with **BCrypt**, following OWASP security best practices.
- Designed and built **RESTful APIs** with Spring Boot and integrated them seamlessly with a React.js frontend.
- Deployed frontend on **Netlify** and backend on **Railway**, demonstrating full cloud deployment ownership.

E-Commerce Web Application

React.js, Node.js, Express.js, MongoDB • Built a scalable full-stack e-commerce platform covering product listing, cart management, and end-to-end checkout flow.

- Designed **RESTful APIs** for authentication, product catalog, and order management; implemented real-time cart updates, search, and filtering with **React Hooks**.

Business Landing Pages (Freelance)

Live:mahavirchemicalindia.com/dhruvinvestments.in/cgitech,netlify.app

React.js, HTML5, CSS3, JavaScript, Web3 APIs

- Delivered **mobile-responsive landing pages** for multiple clients; integrated Web3 inquiry forms and applied lazy loading to improve page load performance.
- Managed full client lifecycle: requirements gathering, iterative development, and on-time delivery.

ACHIEVEMENTS & ACTIVITIES

- Built **4+ full-stack MERN applications** from ideation to production, covering auth, database design, and cloud deployment.
- Delivered multiple end-to-end freelance web projects with consistent on-time delivery and strong client communication.
- Actively studying **system design, DSA, and competitive programming** for top-tier SWE roles.
- **Interests:** Open Source, Competitive Programming, Web3, Cloud Computing **Languages:** English, Hindi, Marathi.
